DARTH VADER

GALACTIC EMPIRE

CYBORG
UNIQUE HERO
SITH LORD
CONFLICTED
MEDIUM 5

FORCE THROW
Instead of using the Force Push special power this turn, you may choose a small or medium object or opponent's common figure within 4 clear sight spaces of Darth Vader and place it on any other empty space within 4 clear sight spaces of, but not adjacent to, Darth Vader. If Darth Vader is engaged, you must either choose an adjacent figure to throw or place the thrown object or figure adjacent to a figure engaged with Darth Vader. After placing the thrown object or figure, roll one unblockable attack die against both the thrown object or figure and an adjacent object or figure. Figures moved by Force Throw will not take any leaving engagement attacks.

DARK SIDE AGGRESSION
After making a normal attack, Darth Vader may attack the same figure 1 additional time. Darth Vader rolls 1 fewer attack die for the second attack. Darth Vader may not use Dark Side Aggression and Force Throw in the same turn.

LIGHTSABER DEFENSE
When defending against a normal attack from an adjacent attacking figure, if Darth Vader rolls any excess shields, the attacking figure receives one unblockable wound. When defending against a normal attack from a non-adjacent figure, all blanks rolled count as additional blocks.
