

ALIASQTIP'S EXCLUSIVE ADVENTURE PACKS

SANDBAG BUNKER
Adventure Pack #5

Includes:

- Sandbag Bunker /w optional roof.

Instructions / Notes:

- Print all of the pieces onto standard cardstock and carefully cut them out.
- Score along the fold-lines to make folding easier. Reverse-score all the fold-lines of one of the sandbag-wall pieces. This one will be used for the interior wall texture. Also reverse-score the metal roof's glue tabs.
- Attach the roof to the metal side-walls and install the crosspiece for added structural integrity.
- Glue exterior sandbag-wall to the ground piece.
- Glue the finished metal roof/wall piece to the inside of the bunker and then attach the interior sandbag-wall. Alternatively, you can finish the bunker without attaching the roof/wall piece and just set it inside the bunker during play. This way it can be removed if desired.
- You may want to glue two pennies to the bottom of the structure for added weight.
- Figures can be placed on the roof if desired. The bunker is 7 levels tall. With a little creativity you can use ladder pieces or an overhang to allow non-flying figures access to the roof.
- Print out a couple bunkers and create your own capture-the-flag type scenario!
