1 Valcarren Wasteland

The travel through the The Valcarren Wastelands is slow. The heat is barely bearable, even at night. Suddenly there's a low thump, it's barely audible. Again you hear it. It continues, growing in volume, you can feel it in your bones. Slowly the thumping grows into a loud rumble. The earth itself begins to shake violently as rocks are pushed up out of the ground. Lava begins to pour out, and a dark crevice opens up in the middle of the landscape. In an instant it stops, and a uneasy silence sets over you. On the other end of the crevice an unpleasant sight greets you.
